General Information

SALE HEADQUARTERS:

30945 Juniper Ave. - Hinton, Iowa
Located 3-1/2 miles east of Hinton, Iowa

ACCOMMODATIONS:

Baymont Inn (712) 548-4910
US 75 & 12th St SW, Le Mars, IA 51031
Other hotels are available in the surrounding area including:
Stoney Creek Inn (712) 234-1100 Comfort Inn (712) 274-1300
Holiday Inn Express (712) 546-1700 Fairfield Inn (712) 276-5600

TRANSPORTATION:

United Airlines serve Sioux City, Iowa - <https://flysux.com/>
Sioux Gateway Airport FBO - Hawthorne Aviation (712) 258-6563
We will be glad to meet you if you NOTIFY US IN ADVANCE.

TRUCKING:

Jauer Dependable Genetics will assist in any way we can to line up transportation and keep it as reasonable as possible.

GUARANTEE:

All cattle sell under the Current Standard Terms and Conditions adopted by the American Angus Association.

INSPECTION:

Cattle may be viewed at the ranch prior to the sale.

HEALTH:

All cattle sell with the proper health papers for interstate shipment. All females have been managed with a comprehensive herd health program. Heifers have received their first Scour Boss shot.

INSURANCE:

Insurance will be available sale day.

TERMS:

Cash, animals will not be allowed to leave without payment.

MISC:

Corrections made from the block will take precedence over any errors made inadvertently in the sale book. Buyers unable to attend the sale may send their bids to the Field Representatives, the Auctioneer, Jauer Dependable Genetics or bid online. Bids will be handled with the strictest of confidentiality.

If an animal does not sell or the buyer fails to pay for any animals they purchase, we reserves the right to retain ownership and offer them for sale at a later date.

Lunch will be served on sale day.

PLEASE BRING THIS CATALOG WITH YOU ON SALE DAY

Has your operation experienced an unusual assortment of difficulties this past year? It seems to be the norm for most of us lately. Inflation, drought, storms, labor shortages, you name it; we've all been through some tough times recently. We went through one of the worst droughts we have ever seen last summer. We've never seen creeks and ponds dry up like that before. We had to get creative just to keep the cattle watered, not to mention making sure they had grass to eat. The pastures got pretty short this fall; we will definitely need some moisture this winter if we're going to replenish them this spring. The cows did, however come through it all in great shape. We feel fortunate that we have maintained a moderate frame and efficient herd of cows that allows them to maintain their flesh when conditions get tough like that. We weaned calves a little early and got the cows out on stalks where they could continue to graze and take some pressure off the pastures. Anyone who thinks moderate frame cows don't make that much difference needs to tour a drought-stricken area sometime. Our cows were fat, healthy, and content; not sure if the same could be said of most of their bigger frame, harder doing counterparts.

Of course, there are many different types of breeding programs out there. Bigger frame, carcass-type cattle and club calf programs are probably the hottest things going in the beef industry right now, but we don't really follow any of those trends. The scope of our program continues to be to breed moderate frame, maternally efficient Angus and Angus cross cattle that maintain their flesh year-round on grass and forage environments without the need of excess feed and grain. Our ideal cow is 4 - 4.5 frame and 1200 - 1400 lbs. mature weight. She has a nice, tight, level udder, good feet, and an attractive structure with a good disposition. She must calve easily, breed back early, and wean a nice calf each year. Obviously every cow can't be perfect, but with a strict program of breeding and selection, it is possible to sustain an entire herd of this type of female. Now you certainly can't maintain a herd of cows like that by chasing every fad or hot new sire that passes through each year. We have managed to stay on course for over 40 years, and the resulting consistency is evident in our cow herd and the entire offering in this sale. Our females flesh easily and have the body type that is suitable for almost any environment. They have the unique ability to fit right into nearly any operation and they thrive in low input grass and forage-based programs. Our coming two-year-old bulls are hard and lean and ready to go to work. They have the maternal power to produce high capacity, easy fleshing and efficient replacement females and their bull calves will gain in the feedlot right along with the best of them.

If this is the approach you have been searching for, look no further. The cattle in this sale come right from the heart of our herd. There is tremendous depth in the entire offering of spring bred cows, fall bred pairs, bred commercial heifers, and coming two-year-old bulls. The cows are stout and productive and several are strong candidates for flushing programs. Check out the fancy set of black, red, and baldy commercial bred heifers again this year. The bull offering is among the best we have ever produced. They are the kind that will produce the elite type of females you see in this sale. They are the top 30% of our bull crop. You may notice all the High Valley bulls in the offering (tattoos 1201 – 1253). They are from the group of cattle we purchased from the great Dave Duncan cow herd in Washington. They are a tremendous set of bulls and offer some outcross breeding from our other bulls. We are excited to see that you have chosen to look into our program, and we are confident that you will like what you see. We hope you will come and evaluate the cattle for yourself. If that is not possible, please contact us and we will be happy to help you find the animals that fit your needs. Feel free to contact us if we can answer any questions about our program.

Sincerely,
The Jauer Family

VIDEO CLIPS AVAILABLE – Video clips are available on all spring bred cows, fall pairs, and bulls.

Visit www.jauerangus.com and click on the link to view the videos.

PREGNANCY EVALUATIONS ON ALL SPRING BREDED FEMALES - All the spring bred females were pregnancy checked by Dr. Zach Westoff, DVM - Le Mars Vet Clinic. Every spring bred female was confirmed pregnant and is guaranteed as such unless otherwise noted.

SEmen EVALUATION ON ALL BULLS - All bulls have passed a semen evaluation conducted by Dr. Zach Westoff, DVM - Le Mars Vet Clinic. We recommend that you have your own vet re-evaluate every bull that you purchase before turning them out. All bulls are guaranteed through their first breeding season.

CATTLE CLIPPING AND FITTING – Provided by Hoeftling Show Cattle. Visit them on Facebook - @hoeftlingshowcattle

RETAINED INTEREST ON ALL BULLS - Unless otherwise stated, all bulls sell with 2/3 semen interest and full possession. The new owner will have full possession and full salvage value of their bull. Occasionally we sell a bull that we wish to draw semen on. If this is the case, we will contact you and it will be done at your convenience and our expense. After expenses, there will be a split on the net revenue of any semen sold at the rate of 2/3 to the new owner and 1/3 to Jauer Dependable Genetics.

NON-CREEP FED - Our spring calves receive no creep or feed prior to weaning. We feel creep feed masks the true milking ability of a breeder's cow herd. Our bulls are put on a growing ration after weaning so as not to over-condition the bulls and hamper their reproductive abilities. We deliberately do this because it is the responsibility of a breeder to sell bulls that are in the proper breeding condition. A fat bull always looks good at a breeder's sale, but all too often, they will have problems in the breeding pasture later on. These bulls are hard and lean and ready to go to work.

BULL TEST – The bull calves were weighed when they were freeze branded and reweighed in the spring to record their yearling weights. All bulls were fed a high roughage-grower ration (hay, stover, silage, distillers, & mineral) - TDN 74%; NeG 50 Mcal/cwt; CP 13%; NDF 40%. The test period lasts approximately four months; ADG is calculated based on actual weights. Bulls were moved to grass June - November.

FLESHING SCORE - We place a lot of importance on breeding cattle that have fleshing retention qualities. Cows that flesh easily on forage tend to breed back early and stay in the herd longer. Bulls that flesh easily on roughage and hold their flesh in the breeding pastures are more likely to sire easy fleshing daughters as well. The fleshing score we are using is an in-herd appraisal as to how we feel a bull will flesh when put out in the real world, as well as anticipating the future fleshing ability of his daughters. We have scored these bulls on a scale of 1 – 5 stars, 5 being very easy fleshing and 1 having poor fleshing ability. Only bulls with a score of 3 or higher were selected for inclusion in the sale. Select the higher scoring bulls if you have problems with fleshing retention in your herd.

CALVING EASE SCORE – Getting a live calf is more important than any other trait. Although the environment has a lot to do with a calf's birth weight, selecting for calving ease from the sire and dam can help to insure you get that live calf on the ground. The calving ease score we are using was calculated based on each bull's actual birth weight, Birth and CED EPDs, and their body confirmation. Any bull purchased in this sale can be safely used to breed cows, but bulls that will be used to breed heifers should be evaluated heavily on calving ease. We have scored these bulls on a scale of 1 – 5 stars, 5 being very easy calving and 1 having a higher likelihood of siring heavier birth weight calves. Only bulls with a score of 3 or higher should be considered for use on heifers.

- This is not the first time we've led the sale off with a Mountain Pass daughter, but it is by far the best one we have ever raised. Lot 1 in our sale always has had a reputation of us bringing you the best from our herd. This beautiful young female has that femininity you need in a female and still maintains power, width, volume, and capacity. Her granddam went into a donor program at Hague Ranch in Nebraska and had several top bulls in their recent sale. This female needs to follow in these footsteps and go into a donor program as well. She ratioed 111 on weaning and 108 on yearling as a heifer calf. We A.I. bred her to the great Jauer Emblazon 203 sire and many of these daughters have led our sale off as well. Breed the best to the best and perpetuation will ensue.

- I hope this cow fits down the runway to our sale ring. She is all middle, the amount of volume and capacity she has is impressive. She has numerous foundation females that are in her pedigree - top and bottom. I could go on for hours, there are so many. Any offspring that will come from this cow will result in the perpetuation of all these females before her. You could mate this cow about any way possible and know it will work. Donor Quality.

- We've been quite fond of this cow since she was a young heifer. She has a fancy made phenotype with great length and depth. Her mother - the Jauer Ultima 4030 cow was unique as well. She sold to Lance Cline and Robert Epling a couple years ago through our sale. Club calf guys – take a look at this beautiful cow, she'll add style and keep them stout.

- Jauer Anchor 4057 - the sire of lot 4 has sired some of the most attractive females we have ever raised. The udders on these cows are perfectly level and full of milk. We are using Jauer Anchor 4057 strong in our A.I. program. When you walk out into the pasture this cow just sticks out like a sore thumb, she is flat out beautiful. She's young and could be mated about any way. A crossbred mating on her would be hard to beat.

- This female resulted from an embryo out of the great Jauer Honest 1017 cow. She was flushed numerous times and lived to be 17 years old. Lot 5 is a quarter-blood Simmental out of OCC Rear End. If you're trying to make some fabulous females use Rear End. They are awesome and yes, she is bred to the original Lock N Load. We had her bred the same way last year and she delivered a stout blaze faced bull calf. Hoping for a heifer on the mating this year.

- This young Fully Loaded Simm/Angus second calf heifer is as good as they come. The Lock N Load cattle really mesh well with our cattle. They add a little more bone and are usually clean fronted. Lot 12's dam has a top notch pedigree - beautiful females that have made more beautiful females. A BC Balance calf from her will add another great in this pedigree.
 - A.I. bred 7/8/2022 to BC Balance 516-7
 - Pasture exposed 7/18/2022 - 9/20/2022 to KMJ Overload 912G

- Oh boy, you want to talk about a cow that is as wide as a rhino and she's kind of shaped like one too. If you took all the meat out to this cow and laid it on a table, you would need one heck of a large table. Her mother is the only Anchor daughter we have left in the herd, and she is still going at 12 years old. Not to mention she was sired by the great OCC Exodus 889 cow. Either bull that this cow was mated to would work well.

- When we first started breeding red genetics into our herd, we used the HXC Conquest sire. That semen is now extremely rare and expensive, so you know a lot of people have used him or are looking for it. Lot 22 cow is a wide-bodied cow that has been a great Red Angus starter female for us. I hate to see her go. She has a personality all her own.

- When you look through this catalog, you'll see that most of the cattle are moderate to low birth. Nobody wants calving problems, a live calf is better than a dead one any day of the week. When you look at lot 27, you'll see she is low birth but still very stout. It takes females like lot 27 to add power and fleshing ability to low birth genetics, which makes the type of cattle that work in the real world.
- Pasture exposed 7/11/2022 - 9/21/2022 to Koupal Cedar Wind 928; 7/18/2022 - 9/21/2022 to Jauer Storm 7181 2512

- This OCC Big Time daughter is tough as nails. She is a cow that knows how to survive and work for a living. She always brings in a good calf at weaning time and turns around and does it again the next year. A calf by Duff Carry On would be a good one.
- A.I. bred 7/8/2022 to Duff Carry On 252
- Pasture exposed 7/18/2022 - 9/21/2022 to Sinclair X- Plus 9XX11; 7/18/2022 - 9/21/2022 to Sinclair Dynasty 0WC2; 7/18/2022 - 10/11/2022 to Black Grove Rito 235

- Lot 55 is a Jauer Downpour 6006 daughter that goes back to Connealy Thunder. Thunder is a popular bull in the breed but the main reason we used him was because he goes back to the Jauer 353 Traveler 589 bull. We wanted to bring some of these old genetics back into the herd. Lot 55 is an easy doing cow, she keeps her flesh all year around.
- Heifer calf at side; born 8/31/22; BWT 85 lbs.
- Pasture exposed 11/28/2022 - 01/28/2023 to Jauer Earthquake 738

- Good maternal bulls should be masculine and high crested; and maternal females should be feminine and wedge shaped. Lot 60 is just that female. I just love females with this style. I'm sure she gets a lot of her looks from her mother – the Jauer Ultima 4030 cow. The heifer calf she is raising is already showing signs of carrying on the tradition in this family tree.
- Heifer calf at side; born 9/18/22; BWT 95 lbs.

- The Jauer Mountain Pass 32 819 dam is a moderate framed cow but man can she produce. To me, this kind of efficiency is what it's all about. Lot 89's IMF and ribeye are outstanding and his ratios are among the top; all coming from an 1100 lb. cow. This bull will flat out work in any environment.
- Dam's Production: BW 3 @ 96, WW 2 @ 104, YW 2 @ 104
- Fleshing score: ★★★★★
- Scrotal: 39.0 cm
- Calving ease: ★★★★★

- We really hate to part with this bull. We sure would like to work something out with his new owner to possibly use or collect him in the future. He is sired by the \$800,000 Coleman Bravo sire and when you look at the bottom side of the pedigree, you see great cows like Jauer Exodus 726, a cow that did so much for our program. Not to mention her daughter - the Jauer 320 Judge 6144 cow (lot 166's mother) is no slouch herself. This pedigree is rock solid. Bulls with this type of phenotype are truly unique, and he's heifer safe too. The amount of volume and depth he carries would impress anyone.

- Selling full possession, retaining 1/2 interest and net revenue sharing.**

- Dam's Production: BW 6 @ 96, WW 6 @ 100, YW 6 @ 100

- I don't know where to start with this bull. This guy could be the thickest bull I've seen at this age. If you stand in front of this bull and look him straight on, you'll see he's as wide as a Mack Truck. He is a crossbred bull with a small amount of Simmental in his pedigree. I don't think you could find a low birth bull of this caliber anywhere in this country. To add to his already star studded physique, his carcass numbers are great too. This bull should be collected to give more people the opportunity to use him.
- Dam's Production: BW 3 @ 84, WW 1 @ 112, YW 1 @ 104

This is the largest group of commercial heifers we have ever offered. The attraction for these heifers has grown steadily every year. We try to put together the highest quality young females we can find from our customers and other real-world cattlemen.

We started A.I. breeding these heifers May 31st to low-birth Jauer herd sires. The maternal traits these bulls pass onto the offspring of these heifers will give them added value. They were sent to pasture a few days later where they were exposed to heifer-safe Jauer bulls. There are always some heifers that have a background of big birthweight so we try to breed them right so you will get a live calf.

There is something for everyone in this group. Larger framed heifers, medium framed, and small grass-type heifers; including Angus, Simm/Angus, Hereford cross, and Red Angus influences to be picked from.

All heifers passed their pregnancy examination and sell guaranteed bred. A preg-check list will be available at the sale and online with estimated breeding dates. They will start calving March 1. They were given their first shot of scour guard.
