General Information

SALE HEADQUARTERS:

30945 Juniper Ave. - Hinton, Iowa
Located 3-1/2 miles east of Hinton, Iowa

ACCOMMODATIONS:

Baymont Inn (712) 308-8446
US 75 & 12th St SW, Le Mars, IA 51031
Other hotels are available in the surrounding area including:
Stoney Creek Inn (712) 234-1100 Hampton Inn (712) 587-6984
Holiday Inn Express (712) 546-1700 Comfort Inn (712) 560-4130

TRANSPORTATION:

United Airlines serve Sioux City, Iowa - <https://flxsux.com/>
Sioux Gateway Airport FBO - Hawthorne Aviation (712) 258-6563
We will be glad to meet you if you NOTIFY US IN ADVANCE.

TRUCKING:

Jauer Dependable Genetics will assist in any way we can to line up transportation and keep it as reasonable as possible.

GUARANTEE:

All cattle sell under the Current Standard Terms and Conditions adopted by the American Angus Association.

INSPECTION:

Cattle may be viewed at the ranch prior to the sale.

HEALTH:

All cattle sell with the proper health papers for interstate shipment. All females have been managed with a comprehensive herd health program. Heifers have received their first Scour Boss shot.

INSURANCE:

Insurance will be available sale day.

TERMS:

Cash, animals will not be allowed to leave without payment.

MISC:

Corrections made from the block will take precedence over any errors made inadvertently in the sale book. Buyers unable to attend the sale may send their bids to the Field Representatives, the Auctioneer, Jauer Dependable Genetics or bid online. Bids will be handled with the strictest of confidentiality.

If an animal does not sell or the buyer fails to pay for any animals they purchase, we reserves the right to retain ownership and offer them for sale at a later date.

Lunch will be served on sale day.

PLEASE BRING THIS CATALOG WITH YOU ON SALE DAY

Welcome to Jauer Dependable Genetics 48th Annual Bred Female & Bull Sale. For all our returning customers, we'd like to extend our deepest gratitude for you for all your continued support. For any new customers, we appreciate you taking the time to check us out.

There have been a lot of changes happening in our country the past year with a lot more changes to come. Even though there are so many changes happening all around us, we strive to stay the course here at Jauer Dependable Genetics. The scope of our program has always been to produce moderate frame, deep bodied, low maintenance mamma cows and big butted, wide ribbed, easy fleshing, maternally efficient bulls.

The drought finally subsided here last spring and was promptly replaced with floods. Luckily, when the water receded we were blessed with an abundance of good grass. We know there are many areas out west that are still battling drought and we hope that their rains will return to normal soon. It is always important to plan ahead; you never know what the world will throw at you from year to year. Cattle that are efficient converters of forage are better able to adapt to the variety of conditions that they may encounter. We are able to run more cows on fewer acres and that is one of the best ways to increase the profitability of our cow herd. If you are struggling to find enough grass to support your cows, cattle like the ones you see in this sale are one of the best ways improve your situation.

We designed the females in this sale to fit right into your program. They will take care of themselves and will have the flexibility to allow you to breed them to fit your operation and environment. JDG bulls can moderate the frame of taller cows and bring fleshing ability and capacity in their replacements. Once you have a base of efficient, low maintenance mamma cows in your herd, they will start to work for you instead of you working for them all the time. We all work extremely hard in this business and anything that can make our lives a little easier is a win in our mind.

We evaluate our cows each year and design a breeding program that perpetuates these traits using all the resources we have available to us. For instance, we are seeing great results from offspring from the High Valley cows we bought a few years back. They have allowed us to bring back some of the old genetics we used years ago to build our program. There are several of those bulls and cows in the offering. Be sure to check them out.

Our goal is to produce cows that are 4 - 4.5 frame and 1100 - 1300 lbs. mature weight. They should have nice, tight, level udders, good feet, and attractive structures with good dispositions. Our cows must calve easily, breed back early, and wean a nice calf each year. We have managed to stay on course for over 40 years by staying disciplined and focused on our goals. Our ideal cow type does not change even though the beef industry ideal seems to shift every few years. It is easy to see the resulting consistency that is evident in our cow herd and the entire offering in this sale.

If this is the approach you have been searching for, look no further. The cattle in this sale come right from the heart of our herd. There is tremendous depth in the entire offering of spring bred cows, fall bred pairs, bred commercial heifers, and coming two-year-old bulls. The cows are stout and productive and several are strong candidates for flushing programs. Check out the fancy set of black, red, and baldy commercial bred heifers again this year. They are attractive young females that will make nice additions to your herd. The bull offering is among the best we have ever produced. They are the kind that will produce the elite type of females you see in this sale. They are the top 30% of our bull crop and none have been sold from this group prior to the sale. We are excited to see that you have chosen to look into our program, and we are confident that you will like what you see. We hope you will come and evaluate the cattle for yourself. If that is not possible, please contact us and we will be happy to help you find the animals that fit your needs. Feel free to contact us if we can answer any questions about our program.

Sincerely,
The Jauer Family

VIDEO CLIPS AVAILABLE - Video clips are available on all spring bred cows, fall pairs, and bulls. Visit www.jauerangus.com and click on the link to view the videos.

PREGNANCY EVALUATIONS ON ALL SPRING BRED FEMALES - All the spring bred females were pregnancy checked by Dr. Zach Westoff, DVM - Le Mars Vet Clinic. Every spring bred female was confirmed pregnant and is guaranteed as such unless otherwise noted.

SEMEN EVALUATION ON ALL BULLS - All bulls have passed a semen evaluation conducted by Dr. Zach Westoff, DVM - Le Mars Vet Clinic. We recommend that you have your own vet re-evaluate every bull that you purchase before turning them out. All bulls are guaranteed through their first breeding season.

CATTLE CLIPPING AND FITTING - Provided by Hoefling Show Cattle. Visit them on Facebook - @hoeflingshowcattle

RETAINED INTEREST ON ALL BULLS - UNLESS OTHERWISE STATED, ALL BULLS SELL WITH 2/3 SEMEN INTEREST AND FULL POSSESSION. The new owner will have full possession and full salvage value of their bull. Occasionally we sell a bull that we wish to draw semen on. If this is the case, we will contact you and it will be done at your convenience and our expense. After expenses, there will be a split on the net revenue of any semen sold at the rate of 2/3 to the new owner and 1/3 to Jauer Dependable Genetics.

NON-CREEP FED - Our spring calves receive no creep or feed prior to weaning. We feel creep feed masks the true milking ability of a breeder's cow herd. Our bulls are put on a growing ration after weaning so as not to over-condition the bulls and hamper their reproductive abilities. We deliberately do this because it is the responsibility of a breeder to sell bulls that are in the proper breeding condition.

BULL DEVELOPMENT - The bull calves are put out to grass in June. They receive salt and mineral and are removed in November. All bulls were fed a high roughage-grower ration through the winter (hay, stover, silage, distillers, & mineral) - TDN 74%; NeG 50 Mcal/cwt; CP 13%; NDF 40%. We put a lot of emphasis on growing our bulls slow and natural. Fat bulls look great in the sale ring, but we feel there are too many problems that come along with pushing them too hard. These bulls are hard and lean and ready to go to work; they are guaranteed not to fall apart when you get them home.

FLESHING SCORE - We place a lot of importance on breeding cattle that have fleshing retention qualities. Cows that flesh easily on forage tend to breed back early and stay in the herd longer. Bulls that flesh easily on roughage and hold their flesh in the breeding pastures are more likely to sire easy fleshing daughters as well. The fleshing score we are using is an in-herd appraisal as to how we feel a bull will flesh when put out in the real world, as well as anticipating the future fleshing ability of his daughters. We have scored these bulls on a scale of 1 - 5 stars, 5 being very easy fleshing and 1 having poor fleshing ability. Only bulls with a score of 3 or higher were selected for inclusion in the sale. Select the higher scoring bulls if you have problems with fleshing retention in your herd.

CALVING EASE SCORE - Getting a live calf is more important than any other trait. Although the environment has a lot to do with a calf's birth weight, selecting for calving ease from the sire and dam can help to insure you get that live calf on the ground. The calving ease score we are using was calculated based on each bull's actual birth weight, Birth and CED EPDs, and their body conformation. Any bull purchased in this sale can be safely used to breed cows, but bulls that will be used to breed heifers should be evaluated heavily on calving ease. We have scored these bulls on a scale of 1 - 5 stars, 5 being very easy calving and 1 having a higher likelihood of siring heavier birth weight calves. Only bulls with a score of 3 or higher should be considered for use on heifers.

- I've posted a lot of pictures of this female over the years. Every time I see her, she just sticks out like a sore thumb. It's not because she's the thickest female in our herd but she is one of the most feminine and angular cows we own. Her udder is super milky allowing her to raise great calves. She is the mother of the Capitalist 316 son that will lead off the bulls in this sale. He is as deep as he is wide. Coming from this little cow, it is truly amazing what these kinds of females can accomplish. A whole herd of females like her would set any operation on top in the USA. The matings and opportunities this cow offers are endless. Put her in your donor pen and make as many from her as you can.

- We used Soo Line Motive on our heifers. They come easy and are very angular. Lot 2 features that wedge shape that a lot of people are after these days. She is a very functional cow and she has a +19 SEN score so you know she's also very efficient. An External Law calf from her should be a homerun.

- This female was the pick of the heifers for my son to show in 4H at our 2020 county fair. She is halter broke and we call her Copper. She is an outstanding producer, and we have already kept a herd bull out of her. I bred her to Emblazon last year, and she weaned off a magnificent bull calf that I'm sure we will be seeing a lot of in the future here. That is the reason for the Jauer Emblazon 203 mating we chose for her this year.
- A.I. bred 7/18/24 to Jauer Emblazon 78 203

- The Big Time females around here are top of the line. That bull just works in our program. Lot 6 is big broody cow with lots of volume and capacity. We showed her in the county fair as a breeding heifer in 2021. She raised the biggest bull calf this year sired by Coleman Marshall. He will be used heavily again this coming spring. An SR Rainfall calf from her should be great.

- Here is a young OCC Accolade daughter out of a Dave Dunca High Valley Cow. Not sure we should be bringing this one go. She has a touch more frame which is expected with Accolade. A McCumber Big Time calf would add a touch of line breeding and would add even more predictability to this pedigree.

- Pretty neat pedigree here. Lot 8 is a beautiful young female out of Dynasty OWC2 - a bull we bought from the Sinclair sale a few years back. It's challenging to bring in outcrosses and new breeding and it's always a learning experience, but I think we hit the nail on the head with this one.

- The Jauer Anchor 5136 cow was about as fertile of a cow as you could find. She was here past 15 years of age. Her last 2 years she raised a calf and could barely walk and she still bred back. Lot 9 is a beautiful female that we should not be parting with. She will add a lot of value to her new owner.
- Pasture exposed 7/15/24 - 9/20/24 to C V C Free Grazer 811F; 8/05/24 - 9/20/24 to Jauer Eclipse 793

- Lot 27's sire - the Jauer Homestead 542 bull got hurt at a young age and we had to let him go. If I could go back in time, I would send him to the stud. I would take a whole herd of his daughters. They are so feminine and functional. They are eye catching, efficient, thriving bovines. Don't pass up this female.

- We decided last minute to put Lot 36 in the sale. She will sell open - ready to flush or breed. She is an ultra-thick, big-hipped female that is super fancy. Show guys; be sure to look at her - she has that sleek front, and big top with a little added bone that makes her so attractive. Lot 36 is 1/8 Gelbvieh to add just a touch of hybrid vigor. The rest of her pedigree is flawless with some great Jauer and OCC producers injecting their potency. You could take her home and put her straight into your donor pen. She is a very diverse female and there are so many ways she could be bred.
- Sells Open – ready to flush or breed

- We sampled Bubs Southern Charm on a few cows. Southern Charm is a massively thick bull. He is a little different from the norm around here so if you are looking for some outcrosses genetics, take a look at this female. Her last calf weaned at a ratio of 111.
- Bull calf at side born 11/8/2024 sired by Goodview Judge 132J, BW 96 lbs.
- Pasture exposed to SR Rainfall 046 11/27/2024 – 1/25/2025

Angus Bulls

We will be adding a few addition bull lots not listed in the catalog. Please check the supplement sheets prior to the sale for added lots and any corrections that need to be made.

• Lot 70 is the result of a flush of the Jauer 203 Emblazon 7181 cow. We had a full brother from the same flush that we used for several years. We called him Extension because of his length. The daughters we retained from him are awesome. I think Lot 70 is better than his full brother. His mother was a one-of-a-kind female. I would love to keep this guy and use him, but I think it's someone else's turn to use these genetics.

- Fleshing score: ★★★★★☆

- They say feminine females produce masculine bulls. This bull's mother sells a lot 1 in this sale, and she is as feminine as they come. This is the kind of bull we all strive to produce. He is as deep as he is wide. He gained over 4lbs a day on a simple high roughage diet and has a 40 cm scrotal for added fertility. His sire - LD Capitalist 316 is a proven bull that has been used all across the country. After I saw him at Worlds West Bull Stud in Montana, I knew we needed to use him. Lot 74 needs to go straight to the stud to be collected. We will be keeping an interest in this bull and hope to use him in the future.
- Weaning Ratio 100 • Yearling Ratio 105
- Fleshing score: ★★★★★
- Scrotal: 40.0 cm
- Birth weight: 86 lbs.

- We forgot to get DNA on this fall bull, it is sent in now but won't be back in time for the sale. He is a big bodied, wide based bull out of the Fairview Lady dam we bought in the Grazemaster Sale from Josh Frieberger. She was a massive bodied cow with some impressive genetics in her pedigree. We will be able to register and transfer this bull once the DNA processes.
- Fleshing score: ★★★★★★
- Scrotal: 40.0 cm
- Birth weight: 92 lbs.

- This bull will be in the first pen of bulls at the sale. He is very impressive to look at and just has that masculinity that a bull should have. His dam - the Jauer Game Day 314 cow is super-efficient; she is over 10 years old and never misses. Lot 104 is a low birth, high fertility bull with a 40 cm scrotal. His next owner will be very proud to put him in the front pasture.
- Weaning Ratio 115 • Yearling Ratio 109
- Fleshing score: ★★★★★
- Scrotal: 40.0 cm
- Calving ease: ★★★★★☆
- Birth weight: 75 lbs.
- Selling full possession, retaining 1/2 semen interest and net revenue sharing.

- Lot 123's mother is a Hereford-Angus cross cow that was also shown at the fair. She is a beautiful black-white-faced cow with a great udder and a great temperament. She still walks up and lets Paxton rub her head out in the pasture. Lot 123 will also work on heifers, it is always a plus to use a little heterosis on heifers.
- Weaning Ratio 107
- Fleshing score: ★★★★★★
- Scrotal: 37.0 cm
- Birth weight: 74 lbs.

Commercial Bred Heifers

These heifers come from the herds of several of our customers. They let us come in and pick out some of their best heifers. Many of them have Jauer genetics in their pedigrees. We take them home and feed them until spring. They are AI'd to calving ease Jauer sires and then put out on grass all summer where they are exposed to other young Jauer calving ease bulls. They came in this fall in great shape and are ready to go out and make some productive young cows for their new owners. Please check the supplement sheet for expected calving dates. We are always looking for additional yearling heifers to buy for next year. Please contact us if you have heifers to sell. These heifers will sell in groups of two. The winning bidder will have the option to take their choice or both for two times the money.
