## General Information

**SALE HEADQUARTERS:**

30945 Juniper Ave. - Hinton, Iowa

Located 3-1/2 miles east of Hinton, Iowa

**ACCOMMODATIONS:**

Baymont Inn (712) 308-8446

US 75 & 12th St SW, Le Mars, IA 51031

Other hotels are available in the surrounding area including:

Stoney Creek Inn (712) 234-1100      Hampton Inn (712) 587-6984

Holiday Inn Express (712) 546-1700      Comfort Inn (712) 274-1300

**TRANSPORTATION:**

United Airlines serve Sioux City, Iowa - <https://flysux.com/>

Sioux Gateway Airport FBO - Hawthorne Aviation (712) 258-6563

We will be glad to meet you if you NOTIFY US IN ADVANCE.

**TRUCKING:**

Jauer Dependable Genetics will assist in any way we can to line up transportation and keep it as reasonable as possible.

**GUARANTEE:**

All cattle sell under the Current Standard Terms and Conditions adopted by the American Angus Association.

**INSPECTION:**

Cattle may be viewed at the ranch prior to the sale.

**HEALTH:**

All cattle sell with the proper health papers for interstate shipment.

All females have been managed with a comprehensive herd health program. Heifers have received their first Scour Boss shot.

**INSURANCE:**

Insurance will be available sale day.

**TERMS:**

Cash, animals will not be allowed to leave without payment.

**MISC:**

Corrections made from the block will take precedence over any errors made inadvertently in the sale book. Buyers unable to attend the sale may send their bids to the Field Representatives, the Auctioneer, Jauer Dependable Genetics or bid online. Bids will be handled with the strictest of confidentiality.

If an animal does not sell or the buyer fails to pay for any animals they purchase, we reserves the right to retain ownership and offer them for sale at a later date.

Lunch will be served on sale day.

**PLEASE BRING THIS CATALOG WITH YOU ON SALE DAY**

Welcome to Jauer Dependable Genetics 49th Annual Bred Female & Bull Sale. For all our returning customers, we'd like to extend our deepest gratitude to you for all your continued support. For any new customers, we appreciate you taking the time to check us out and hope you will find the offering in this sale to be appealing.

Optimism is extremely high in the cattle industry right now. Record high prices are the norm in nearly all aspects of the beef industry. If you are on the selling end of the ledger sheet, the numbers look as good as they ever have. Of course, input prices are at all-time highs as well. Good decision making is still necessary and the most efficient operations will prove to be the most profitable as is usually the case. Building a base of efficient and productive beef cattle continues to be our number one priority. At Jauer Dependable Genetics the scope of our program has always been to produce moderate frame, deep bodied, low maintenance mamma cows and big butted, wide ribbed, easy fleshing, maternally efficient bulls. We breed cattle that have the ability to adapt to the conditions they will encounter when they leave the ranch. Cattle are not pampered here, they are asked to go out and forage and to maintain their flesh when doing so. We want you to feel confident that cows and bulls purchased in this sale will thrive in your operation just like they did when they were here.

We evaluate our cows and bulls each year and design a breeding program that puts an emphasis on maternal traits while maintaining the muscle and structure that make cattle marketable all around the country. Our goal is to produce cows that are 4 - 5 frame and 1100 - 1300 lbs. mature weight which should allow you to run more cows on fewer acres compared to larger frame, more terminal type cows. Our cows should have nice, tight, level udders, good feet, and attractive structures with good dispositions. Our cows must calve easily, breed back early, and wean a nice calf each year. We have managed to stay on course for over 40 years by staying disciplined and focused on these goals. Our ideal cow type does not change even though the popular standard seems to shift every few years. It is easy to see the resulting consistency that is evident in our cow herd and the entire offering in this sale.

The cattle in this sale come right from the heart of our herd. There is tremendous depth in the entire offering of spring bred cows, bred commercial heifers, and coming two-year-old bulls. The cows are stout and productive and several are strong candidates for flushing programs. Check out the fancy set of black, red, and baldy commercial bred heifers again this year. They are attractive young females that will make nice additions to your herd. The bull offering is among the best we have ever produced. They are the kind that will produce the elite type of females you see in this sale. They are the top 30% of our bull crop and none have been sold from this group prior to the sale. Additionally, we decided to offer a few premium embryos this year. They are matings from elite cows and bulls and should produce some outstanding heifer and bull calves.

We are excited to see that you have chosen to look into our program, and we are confident that you will like what you see. We hope you will come and evaluate the cattle for yourself. If that is not possible, please contact us and we will be happy to help you find the animals that fit your needs. Feel free to contact us if we can answer any questions about our program.

Sincerely,  
The Jauer Family

**We will be offering three sets of embryos this year. We have been working with a few like-minded breeders to create some elite matings and have decided to offer a few this year as a bonus.**

Sackman Jilt 2247 sold as a Natural Law sired fetus inside of Jauer 174 Joker 5171 during our 2022 Sale to Sackman Angus in Washington. A few years later, 2247 was offered in Sackman's sale with her first calf at her side. Once we saw her picture and video, we knew she was special. Phenotypically, she is about as beautiful of a cow as you will ever find. Her udder and teat size are as good as you will find on an Angus cow. We purchased half interest in her with Laramie Stipe from Idaho for \$20,000. We have been flushing her IVF and she routinely puts out 80 oocytes and freezes 18+ embryos every time. This is very unusual and is a testament to how fertile of a cow she is.

We are offering 3 matings out of this great cow (3 IVF embryos each). These are matings that we thought would work really well with 2247.

**VIDEO CLIPS AVAILABLE** – Video clips are available on all spring bred cows, fall pairs, and bulls. Visit [www.jauerangus.com](http://www.jauerangus.com) and click on the link to view the videos.

**PREGNANCY EVALUATIONS ON ALL SPRING BRED FEMALES** - All the spring bred females were pregnancy checked by Dr. Zach Westoff, DVM - Le Mars Vet Clinic. Every spring bred female was confirmed pregnant and is guaranteed as such unless otherwise noted.

**SEmen EVALUATION ON ALL BULLS** - All bulls have passed a semen evaluation conducted by Dr. Zach Westoff, DVM - Le Mars Vet Clinic. We recommend that you have your own vet re-evaluate every bull that you purchase before turning them out. All bulls are guaranteed through their first breeding season.

**CATTLE CLIPPING AND FITTING** – Provided by Hoefling Show Cattle. Visit them on Facebook - @hoeflingshowcattle

**RETAINED INTEREST ON ALL BULLS - UNLESS OTHERWISE STATED, ALL BULLS SELL WITH 2/3 SEMEN INTEREST AND FULL POSSESSION.** The new owner will have full possession and full salvage value of their bull. Occasionally we sell a bull that we wish to draw semen on. If this is the case, we will contact you and it will be done at your convenience and our expense. After expenses, there will be a split on the net revenue of any semen sold at the rate of 2/3 to the new owner and 1/3 to Jauer Dependable Genetics.

**NON-CREEP FED** - Our spring calves receive no creep or feed prior to weaning. We feel creep feed masks the true milking ability of a breeder's cow herd. Our bulls are put on a growing ration after weaning so as not to over-condition the bulls and hamper their reproductive abilities. We deliberately do this because it is the responsibility of a breeder to sell bulls that are in the proper breeding condition.

**BULL DEVELOPMENT** – The bull calves are put out to grass in June. They receive salt and mineral and are removed in November. All bulls were fed a high roughage-grower ration through the winter (hay, stover, silage, distillers, & mineral) - TDN 74%; NeG 50 Mcal/cwt; CP 13%; NDF 40%. We put a lot of emphasis on growing our bulls slow and natural. Fat bulls look great in the sale ring, but we feel there are too many problems that come along with pushing them too hard. These bulls are hard and lean and ready to go to work; they are guaranteed not to fall apart when you get them home.

**FLESHING SCORE** - We place a lot of importance on breeding cattle that have fleshing retention qualities. Cows that flesh easily on forage tend to breed back early and stay in the herd longer. Bulls that flesh easily on roughage and hold their flesh in the breeding pastures are more likely to sire easy fleshing daughters as well. The fleshing score we are using is an in-herd appraisal as to how we feel a bull will flesh when put out in the real world, as well as anticipating the future fleshing ability of his daughters. We have scored these bulls on a scale of 1 – 5 stars, 5 being very easy fleshing and 1 having poor fleshing ability. Only bulls with a score of 3 or higher were selected for inclusion in the sale. Select the higher scoring bulls if you have problems with fleshing retention in your herd.

**CALVING EASE SCORE** – Getting a live calf is more important than any other trait. Although the environment has a lot to do with a calf's birth weight, selecting for calving ease from the sire and dam can help to insure you get that live calf on the ground. The calving ease score we are using was calculated based on each bull's actual birth weight, Birth and CED EPDs, and their body confirmation. Any bull purchased in this sale can be safely used to breed cows, but bulls that will be used to breed heifers should be evaluated heavily on calving ease. We have scored these bulls on a scale of 1 – 5 stars, 5 being very easy calving and 1 having a higher likelihood of siring heavier birth weight calves. Only bulls with a score of 3 or higher should be considered for use on heifers.

- Wow what a female! It is a tradition to start off our sale with the best, and this year we chose this beautiful young Sinclair X-Plus daughter to lead off the sale. X-Plus goes back to XXP and we all know how he has made his mark in the Angus breed. Lot 1's mother - the Jauer Rancher 8138 cow is great Jauer 596 Rancher daughter. I always talk about how good of producers those females are. 596 has contributed countless top end females to our program and it seems like their offspring are even better. If you're looking for functionality and soundness, this young cow really fits the bill. Lot 1 seems to put it all together. She has eye appeal, is long bodied, and has just the right amount of bone. Udder quality is always a trait that we select for; our females must have small teat size with a nice milky bag.
- We recently brought OCC Emblazon back into our AI breeding program and we thought he would be a great match on this female. He is a bull we only breed special cows to and we believe this young cow has great things coming in her future.
- A.I. bred 7/17/25 to O C C Emblazon 854E

Jauer Charlo 1220 522  
Jauer Emblazon 822 161

- This Cedar Wind 928 daughter is about as good as they come. She is a beautiful, big bodied, young female. She will have a tick more frame than some of our cows and will add good performance to her calves. Her mother the Jauer Downpour 9032 cow could be the thickest cow we own. The Cedar Wind mating on her really worked. That's the game - determine what bull will work on that certain female. I think we hit a homerun with this one.
- A.I. bred 7/10/25 to Jauer Neville 4150 779

Lot 3

- The 316 Capitalist bull has been widely used all over the country with tremendous results. We've been using Capitalist for several years now and these females are starting to show up at the top of our herd. We are 1/3 owners of a full sister to Capitalist 316 and are flushing her monthly. Embryos from her will be going in next spring. Lot 3 is the type of cow that could rise to the top of anybody's herd. She is a young, easy fleshing, big bodied cow. She is bred to our SR Rainfall 046 bull. Josh Bedell of VICCI Cattle Co. in Oklahoma says Capitalist X Rainfall is the best combination he's ever used.
- Pasture exposed 7/09/25 - 9/27/25 to S R Rainfall 046

- Lot 5 is one heck of a good cow. The Cedar Wind progeny seem to be very consistent. He is a bull that definitely stamps his offspring. The High Valley 4M33 cow is also a really good 12 years old female. Cows that have stuck around this long tend to raise daughters that stay in the herd for years as well. There is just something about this young cow that catches my eye. She should probably not be leaving here. It's hard to let good ones like this go.
- Jauer Neville 779 is another bull we only breed to special cows. He breeds low birth with extremely good fleshing ability. He has sired some thick cattle here and I like to use him on a lot of our Simmental matings.
- A.I. bred 7/10/25 to Jauer Neville 4150 779

- Here is a female we really think a lot of. She is the ideal kind of cow that we strive to produce here. She has that wedge shape and stylish look so many people search for. She has stuck AI every year and ratioed 112 on weaning and 108 on yearling on her last calf sired by McCumber Big Time. She could step right into a flushing program. Cows with this kind of fertility and udder quality are unique. We AI'd her to SAV Rainfall in hopes of creating a herd bull or another special female. Take a good hard look at lot 6 she should not be leaving here but we can't keep them all.

- I get a lot of questions about Pine Bank 4197. The first one always being, "Do those cattle really work?" Well, take a look at this female and see for yourself. She is an ultra-wide female that boasts tremendous power. Cows like her will work in any environment. Her progeny weaning ratio is 111 so you know she milks well and brings in a big calf. When you walk past her pen at the sale she will catch your eye. AI bred to Marshal Law; I would love to see that calf in the future.

- Pretty cool pedigree here and a really neat cow. I think she could be my pick out of all the females in this sale. She is truly a feminine package. This wedge shaped, big-hipped and extremely attractive Pine Bank 4197 daughter will reel you in at first glance. Having the Game Day and Traveler 7111 sires on the bottom side of her pedigree makes her very unique. This cow is a hard one to let go. She has a bright future and could easily go into a flushing program.

- Cedar Wind 928 is a bull that we bought from Lavern Koupal in his sale a few years ago. He is a bull that we used to add a little fame to some of our smaller cows' offspring. He turned out to make some super nice females. Lot 9 is a larger framed cow with a touch more growth and she definitely does not lack in the thickness department. Her mother - the Jauer Game Day 622 female is a cow we probably will never let go. Her pedigree is top notch with OCC Rear End and GDAR Game Day leading the way.

- New Game and First Class are a little out of our realm here, but I have to say lot 10 is one hell of a producer. Not only is she attractive, but she milks incredibly well and brings in a big calf every year. If you follow the Griswold program you know their cattle are extremely popular and well sought after. Lot 10 didn't make it into the second pen in our sale by just being average; she earned her way to the top. Take a hard look at her on sale day, she's one not to overlook.

- The Grass Dynasty OWG1 bull is a bull we purchased from Sinclair's. He is extremely thick and, in my opinion the thickest bull in their sale that year. Lot 11 is a nice young eye appealing female. I look for a lot of fertility and longevity to come from her. An AI calf from Marshal Law could be incredible from her.

- Here's a pretty neat female out of our Sinclair OWG1 bull. The Sinclair cattle are known for being rugged and fertile. They are tough cattle and can handle any environment. Lot 12 has the thickness and fleshing ability to add the extra eye appeal that we like. OWG1 is an outcross for us and adds a little heterosis to our line-bred females.
- Pasture exposed 7/09/25 - 9/27/25 to S R Rainfall 046

- Lot 14 is another nice, wedgy-type female. To me, cows like this are just more fertile and seem to last longer. This cow's sire - the legendary Sinclair Grass Master has worked well for us and semen is getting extremely rare. Her dam - the Jauer Missing Link 841 cow was beautiful cow that sold to JJ Scheckel a few years back.
- Pasture exposed 7/09/25 - 9/27/25 to GVR Carbon 311L; 7/09/25 - 9/27/25 to Jauer Amigo 465 466
- I really like this half-blood Simmental female. There is a lot of thickness in her pedigree. The Jauer Productive 8167 cow was sold to Sackman Angus in Washington and the Jauer Picture Perfect 4155 cow is still here and gets AI bred Simmental every year. Simmental just clicks with these two cows. Lot 16 is a wide topped, big hipped female with the attractiveness that will catch your eye. A SR Rainfall 046 calf from her will be really cool.
- Pasture exposed 7/09/25 - 9/27/25 to S R Rainfall 046

- Lot 21 is a beautiful and feminine young cow. She has always been a favorite of mine. The Payweight cross definitely worked mated with OCC X-tra Wide. We AI'd her to Marshal Law; that mating should really add thickness and frame to her offspring.
- A.I. bred 7/10/25 to Blair's Martial Law 593E
- Pasture exposed 7/17/25 - 9/21/25 to Blairswest Dynamite 56M; 7/17/25 - 9/21/25 to Jauer Real World 395; 7/17/25 - 9/21/25 to Blairswest Glacier 1M; 7/17/25 - 8/08/25 to Mc Cumber Trademark 0109

- Do you know those cows that just tend to stay out of the radar but probably do a better job than most of the cows in your herd? Well, lot 24 is one of those cows; she just does her job and does it well. She ratios 107 and 102 on the 5 calves that she's raised so far. The Jauer Downpour (Connealy Thunder) cattle add some performance. Lot 24 is AI'd to OCC Emblazon because we know what she can produce.

- We have a partial outcross cow here. Hoover Dam is one of the most used bulls in the Angus breed for a reason. They are low birth cattle with good performance. Lot 25's dam is also in this sale. She is an easy fleshing cow that crossed well with Hoover Dam. I know Hoover Dam semen is very hard to find, so take advantage of this female.
- A.I. bred 7/09/25 to Pine Coulee Drifter G372

- Here is a female that does a great job. She is low birth but still packs in a lot of power. She is a bull making machine. She has one of the top bulls in this sale by Marshal Law that is unbelievably good. We used him as a yearling and are super excited about his calves. He ratioed 105 at weaning and 110 at yearling. It seems like a lot of these females with Jauer 9266 or 779 Neville in their pedigree really make it to the top. Those bulls just add so much power that genetics from those bulls show up year after year.

- The OCC Big Time matings around here are most always a homerun. Lot 31 is a testament to that. She is a very easy fleshing cow that holds her weight year around. Her dam - the Jauer Mountain Pass 7005 cow is probably the most productive cow we have. Her JC4 Real bull calf last year was kept for in-herd use. This cow could be mated in so many ways. I would love to see a Simmental cross calf from her.
- A.I. bred 7/11/25 to Jauer Storm 7181 2512

- Years ago, while semen checking herd bulls, we decided to collect Jauer Neville 779. They collected him and took it back to the lab and froze 60 units. Never did I think he would be such an instrumental key to our herd. Now Jauer Neville 9266 is a son of 779 that was also collected successfully and is still used heavily in our heifer program. He has a -5 Birth EPD but has more power than most positive birth bulls. Lot 32 carries these prolific genetics and will pass them on in her calves. Don't miss this opportunity to take these genetics home.

- If you're looking for a cow with a stacked pedigree, here you go. Proven cows and longevity go way back in lot 35's ancestry. Jauer Big Time 826 was a top-notch female that sold in the front of our 2024 sale. Jauer 4197 2271 is a grandma cow at the age of 14 that still resides here. She should be flushed. This cow is very feminine and wedge shaped. These are the kind of cows we strive for here.
- Pasture exposed 7/09/25 - 9/27/25 to GVR Carbon 311L; 7/09/25 - 9/27/25 to Jauer Amigo 465 466

- I just looked up how long ago it was that Jauer 1020 was born. That bull is 25 years old. I know we used him until he was 10 and collected a thousand units of semen on him. We are still using him to this day. How many bulls can stand the test of time? Not very many! Lot 37 is an efficient easy doing female that doesn't ask for freebies. Put her out in the cornstalks in the fall, bring her home in the spring and she'll look the same all year round. What else can you ask for?

- We used lot 54 as a yearling. He is a Natural Law son out of a Griswold Hesston daughter. His mother will probably lead off next year's sale as we were not ready to part with her this year. Lot 54 is super masculine and has that curly neck hair that a lot of people look for in a fertile bull. He is stout and big boned. His bull calves will weigh down the scale, and his heifer calves will lead the way as replacements.
- Weaning Ratio 110 • Yearling Ratio 104
- Fleshing score: ★★★★★
- Scrotal: 39.0 cm
- Birth weight: 98 lbs.

- Lot 55 is a herd bull in the making. He is another bull we used as a yearling and is an eye catcher to say the least. He is super masculine, with loads of power, a big middle and tons of rib-cage volume. He gained almost 4 lbs./day on a high forage diet. Its bulls like this one that you can build a program around. His mother is lot 30 in the female portion of the sale. She is a moderate framed, easy-doing cow that is about as efficient as they come. He is a Marshall Law son that is out of the Bar-E-L Erica 74A cow whose genetics we are looking to replicate. He ratioed very well at weaning and yearling 105-110.
- Weaning Ratio 105 • Yearling Ratio 110
- Fleshing score: ★★★★★
- Scrotal: 40.0 cm
- Birth weight: 88 lbs.
- Selling full possession, retaining ½ semen interest and net revenue sharing.

- Is all the hype worth it when it comes to External Law? We think it is as he is working fabulously here. Interjecting power and depth of rib in everything he's bred to. Lot 56 is a moderate framed bull with a lot of style. Again, the Bar-E-L Erica 74A cow is passing on her phenotype here. This bull will sire a lot of muscle into his calves and his replacements will be very sharp females.
- Fleshing score: ★★★★★
- Scrotal: 39.0 cm
- Birth weight: 86 lbs.

- Well, when you pull out an embryo that has been in the tank for 20 years and it produces a bull like this, you know that mating was a good one. We have had many conservations about keeping this bull. It was a hard decision, but we've decided to lead off the bulls this year with lot 59. We did use him as a yearling so we will get a few calves from him, and we would love to have him collected after the sale.

This is the kind of bull we strive very hard to produce. It all starts with a female good enough to perpetuate herself with this type and kind. The Jauer 1020 Honesty 465 cow was more than just a beautiful female. She was a cow that passed on the phenotype that she possessed.

The sire - Amigo was raised by Duff Angus and Lavern Koupal purchased him. He was a bull that got hurt at a young age so his legacy could have been much greater. We did have a few daughters from him back then and they were awesome. They had some of the best udder quality we've ever seen.

Lot 59 weighed 1000lbs at yearling and boasted a 12inch ribeye. I can't say enough good things about this bull. I think he could compete in any herd in the Angus breed.

- Fleshing score: ★★★★★
- Scrotal: 39.0 cm
- Birth weight: 95 lbs.

• Selling full possession, retaining 1/2 semen interest and net revenue sharing.

- Lot 61 weighed in at just a little more than 1000 lbs. at yearling and had a ribeye over 13 inches. This is a bull that is full of red meat. I like what I see from the Grass Masters sons, they seem to cross well with our females. To work in this program, cattle must flesh easy and be moderate in frame size. Lot 61 fits right in with those traits.
- Weaning Ratio 114 • Yearling Ratio 103
- Fleshing score: ★★★★★
- Scrotal: 39.0 cm
- Birth weight: 88 lbs.

- Old school genetics right here. Everything in this pedigree goes back in time a ways. The Great Plains and Fortunate Son sires give this bull a little bigger frame. The females in his pedigree give him his thickness and attractiveness. Lot 67 gained more on test than almost every bull in this sale at 4.60 lbs./day and has a 15.4 inch ribeye. That's crazy good when these bulls are only fed a ration for a 3 lbs. gain/day. This bull will sire some really good feedlot calves.
- Yearling Ratio 109
- Fleshing score: ★★★★★
- Scrotal: 40.0 cm
- Birth weight: 92 lbs.

- When you see a bull with a masculine crest and his neck is covered with curly bull hair, you know they are going to have a good libido and be very fertile. Now let's look at his numbers, he boasts a great big weaning ratio of 117 and 112 at yearling. With a weaning ratio like that, you know his momma is a calf raising machine. She sells as lot 21 in this sale. Lot 73 gained a whopping 4.55 lbs/day and has a 15.7 inch ribeye. Take a hard look at this bull he will make on heck of a good herd bull for his new owner.

- Weaning Ratio 117 • Yearling Ratio 112

- Fleshing score: ★★★★★

- Scrotal: 39.0 cm

- Birth weight: 95 lbs.

- Dan and Alyssa Walsh purchased lot 39 with this bull calf at her side in last year's sale. After having this pair at home in Kansas they knew he was special and in further conversations with them, we decided he needed to come back home and be prepared to go into this year's sale.
- His dam - Jauer Southern Charm 17 is a really impressive cow - very sharp made, super feminine and wedge shaped.
- Lot 85's sire - SR Rainfall 046 is proving himself here by producing uniform and consistent offspring. Just compare lot 85 to his half-brothers in the sale. 046 is a bull that stamps his calves with tremendous length and style. They are sound footed and extremely thick, easy fleshing cattle. Lot 85 is six months younger than the rest of the bull offering. He passed his semen test with above excellent semen quality. Make sure to have your arm raised when this bull comes through the ring.
- Fleshing score:
- Calving ease:
- Birth weight: 72 lbs.

- Lot 87 is quite the specimen, he puts every trait a bull needs into perspective. He comes in with a 65 lbs. birthweight and takes that to a 1050 lbs. yearling weight. Then take a look at his carcass numbers 14.5 inch ribeye and over 4% IMF. And we are just getting started with what this bull has to offer.
- It is extremely hard to find a bull with this kind of performance and thickness with a +15 CED. He is more than heifer safe with that CED number and a -1.5 birth EPD. Now take a look at his average daily gain which was well over 4 lbs./day on a ration that was designed for 3 lbs. of gain. We know he can convert a high roughage diet into a whole lot of red meat.
- Jauer Anchor 4057 sired the beautiful female that produced this bull. I always talk about how good of a female maker this bull is. We bred her to our SR Rainfall 046 bull and it turned out to be a match made in heaven.
- This is another bull we would love to collect in the future. We did use him on our heifers this summer and can't wait to see his calves this spring.
- Weaning Ratio 107 • Yearling Ratio 109
- Selling full possession, retaining 1/2 semen interest and net revenue sharing.**

- What a showoff, when I was trying to take notes on these bulls - all this guy wanted to do is run around buck and jump. He has a great disposition and moves like a cat. He is sound footed and great on his feet.
- His sire - VE Jett 249k is a half-blood Simmental bull we bought from Vertical Edge genetics in Idaho. He is a low birth bull with a big scrotal for added fertility.
- Weaning Ratio 108 • Yearling Ratio 107
- Fleshy score: ★★★★☆
- Scrotal: 41.0 cm
- Birth weight: 72 lbs.

- Here is another Simmental cross bull sired by VE Jett 249k. 249k is a bull we bought from Vertical Edge Genetics in Idaho. He is a very thick made bull with a touch of Fleckvieh in him. Lot 90 comes in with a moderate birthweight and calm disposition. He is a big quartered bull with plenty of thickness.
- Fleshy score: ★★★★☆
- Scrotal: 39.0 cm
- Birth weight: 78 lbs.

- This guy really hits it out of the park. The genetics behind this bull are incredible - Jauer 203 Emblazon 7181, Coleman Bravo, OCC Rancher and Bold Venture. What a combination, you can see the results when looking at lot 91. He is easily on top when it comes to his ratios - weaning ratio was 115 and his yearling ratio came in at a whopping 118. If you're looking for a bull with some extra performance, look at this quarter blood Simm-Angus bull.
- Weaning Ratio 115 • Yearling Ratio 118
- Fleshy score: ★★★★☆
- Scrotal: 41.0 cm
- Birth weight: 85 lbs.

- Lot 93 is a quarter-blood Gelbvieh Balancer bull. He is long bodied and growthy. His dam - Jauer 203 Emblazon 0348 is one of the best producing cows we own. He will raise some very marketable feeder calves.
- Weaning Ratio 104
- Fleshy score: ★★★★☆
- Scrotal: 40.0 cm
- Birth weight: 91 lbs.

- Here is a bull that spent the whole summer up in South Dakota breeding commercial heifers. He had to cover a lot of ground and I can tell you he never lost a pound. This black hided, red-gene carrier bull is a tank. Duff Red Wood does carry more growth than most of their Red Angus cattle. I think the Red Wood and Earthquake cross is an unbelievably good match.
- Weaning Ratio 104 • Yearling Ratio 106
- Fleshy score: ★★★★☆
- Scrotal: 42.0 cm
- Birth weight: 66 lbs.

- Check out this Gelbvieh Balancer bull, he is really good. When breeding Gelbvieh to our females, we try to bring in some of the Gelbvieh traits without losing the Angus look. We want their great maternal milking strength and outcross heterosis. Lot 97 blew out every bull in this sale when it comes to average daily gain. He gained 5.18 lbs./day. That is unbelievable on a high roughage diet. This guy puts everything together you would want in a crossbred bull. Make sure you take a long look at him on sale day.

- Yearling Ratio 113
- Fleshing score: ★★★★★
- Scrotal: 38.0 cm
- Birth weight: 92 lbs.

- Lot 95 is a black hided, red-gene carrier bull. If you have red cows and want red calves, take a look at this heifer safe bull. He is all Red Angus on the top of his pedigree and also has a touch of Gelbvieh Red Alert on the bottom. Red Alert was a red Gelbvieh bull so there are a lot of red genes in this bull's genotype.

- Weaning Ratio 105
- Fleshing score: ★★★★★
- Scrotal: 39.0 cm
- Birth weight: 67 lbs.

**Blairs Marshal Law 593E**

- Lot 99 does sell as a commercial, but he is just as good or better as a lot of the purebreds in this sale. He was a top rationing bull that doesn't miss out in the thickness department. He is good sized, big boned with a great big topline. Don't miss this chance to implement Marshall Law and Erica 74A into your gene pool. Fleshing score: ★★★★★

- Scrotal: 39.0 cm
- Birth weight: 95 lbs.

# Commercial Bred Heifers

These heifers come from the herds of several of our customers. They let us come in and pick out some of their best heifers. Many of them have Jauer genetics in their pedigrees. They are AI'd to calving ease Jauer sires and then put out on grass all summer where they are exposed to other young Jauer calving ease bulls. They came in this fall in great shape and are ready to go out and make some productive young cows for their new owners. Please check the supplement sheet for expected calving dates. We are always looking for additional yearling heifers to buy for next year.

Please contact us if you have heifers to sell.
